

Air & Space Museum Scavenger Hunt

Directions: As you explore the Smithsonian Air & Space museum, locate each of the aircraft/spacecraft. Take a picture of it with your digital or regular camera. When you return home, create a PowerPoint slide for each picture you have located and give a sentence or two explaining its significance. Each item is worth 2 points extra credit. If you are not going on the DC trip, you can also complete this on your own by going to <http://www.nasm.si.edu/collections/browseobjects.cfm> and finding the pictures.

- 1903 Wright Flyer
